

RevInfotech

revolution redefined

ACCELERATE THE DIGITAL TRANSFORMATION IN YOUR ENTERPRISE

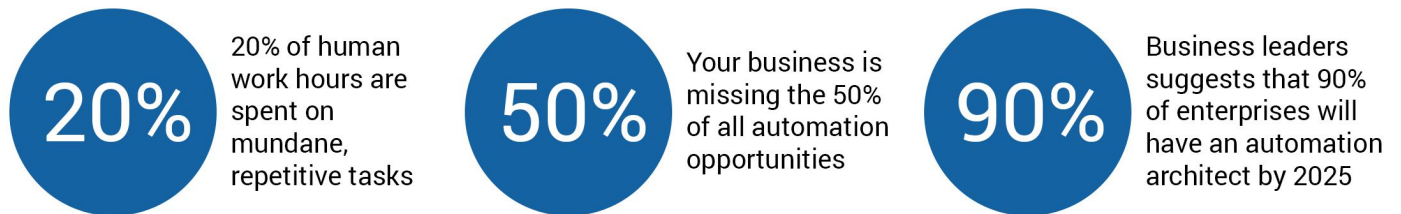

Implementing RPA can change your business drastically in terms of higher efficiency, cost savings and work processes

RPA - THE REVOLUTION IN BUSINESS PROCESS AUTOMATION

With over 53% of enterprises having entered the Robotic Process Automation journey, it is the technology that allows organizations to use software robots to perform efficient tasks in an automated way and adapt ever changing advanced market dynamics. RPA software uses a combination of integrations, advanced technologies, and cognitive processes and provides the enterprise with the tools to enhance productivity and help them in providing a seamless customer experience.

Implementing RPA can be highly beneficial for enterprises and proves to be a highly efficient, cost-effective, and intelligent business process. It reduces work by automatically automating repetitive, rule-based tasks, and grants more time for value-added domain-oriented work, they also emulate specific tasks within an overall business or IT process including manipulating of data, passing of data to and from different applications, triggering responses and executing transactions. RPA services allow enterprises irrelevant of their size to improve productivity and increase ROI.

The question that remains is the right implementation partner, which is a key element for the success of your automation program.

OUR OFFERINGS

RPA consulting : We provide best in class automation assessment services to assist you in developing and identifying processes that demand automation, Our RPA consultants offer you the right RPA tools and present you with automation PoCs.

RPA BOT development: We analyze the process & Bot design to develop Bots for specific requirements. we provide Hybrid BOTS and Cognitive BOTS development as well as their Support and Maintenance.

RPA testing and monitoring: We analyze the requirements in depth and then we Identify automated testing requirements, Prepare test data, Create and Execute test cases by enabling automation scripting with automation tools, Validate data as per the tests and then Analyze and deliver reports.

Revinfotech provides you end-to-end RPA solutions. Automate your business workflows, data extraction, and operational tasks with the most successful implementation for your enterprise

INVOICE PROCESSING

Manual Invoice Processing is a tedious process since the data needs to be copied manually from PDF to Target System NetSuite (Oracle), which increases the chances for human error.

Solution:

This monotonous task of invoice processing can be made easy by automating the entire process with RPA. All data will be updated according to the required systems without the involvement of any human thus it leaves no room for human errors.

Process:

- The vendor sends an invoice via email
- All messages are being read and attachments are stored in the Local System.
- Workflows are developed to automate vendor invoices.
- Logs into Target System (NetSuite) where the information is copied to Target Application (NetSuite).

Benefits:

- Reduced costs on invoice processing
- Employees can focus on significant 100% error-free invoice creation
- Avoid penalties and late payments

CHECK RECONCILIATION

Common challenges encountered in the bank reconciliation process include Duplicate entries, Date and time discrepancies, Human-generated data errors.

Solution:

Rpas have the capability of analyzing and evaluating large volumes of data. Therefore they can perform repeatable tasks with zero room for error – steadily, accurately and effectively.

Process:

- Extracts the relevant documents and data
- Performs a quick check to spot any discrepancies
- Matches data at the transaction level and identifies mismatches and discrepancies
- Investigates the reconciling items, fixes errors, and gets approvals.
- After approval, the entries are finalized and updates are closed.

Benefits:

- Ensures higher accuracy and robustness
- Enhanced matching of records with fewer exceptions
- Easy to use and maintenance
- Saves time and resources

AUTOMATION OF PROCESSES IN ERP

ERP system includes some repetitive and tedious tasks such as including data entry, report generation, and even HR-related functions. However, RPA software bots can take the streamlining process to a new level by bringing automation and eliminating these monotonous tasks.

Process:

- Automates data entry in existing ERP system
- Compares data fields to get actionable insights
- Automates in ERP data migration
- Data mining and analysis
- Real-time data sharing
- Email campaigning

Benefits:

- Increases Efficiency and Productivity
- Brings Scalability and Automation
- Cost-effective
- Improves Customer Services

WHY CHOOSE REVINFOTECH?

- Leading software development company
- Team of highly-skilled professionals with vast experience
- Expertise in various technologies and tools
- Skilled,dedicated and focused developers
