# Recent Portfolio

## Challenge

Before xcoins, there is no trusted platform in the market from where customers can easily buy crypto and get coin delivered in the first hour of order.

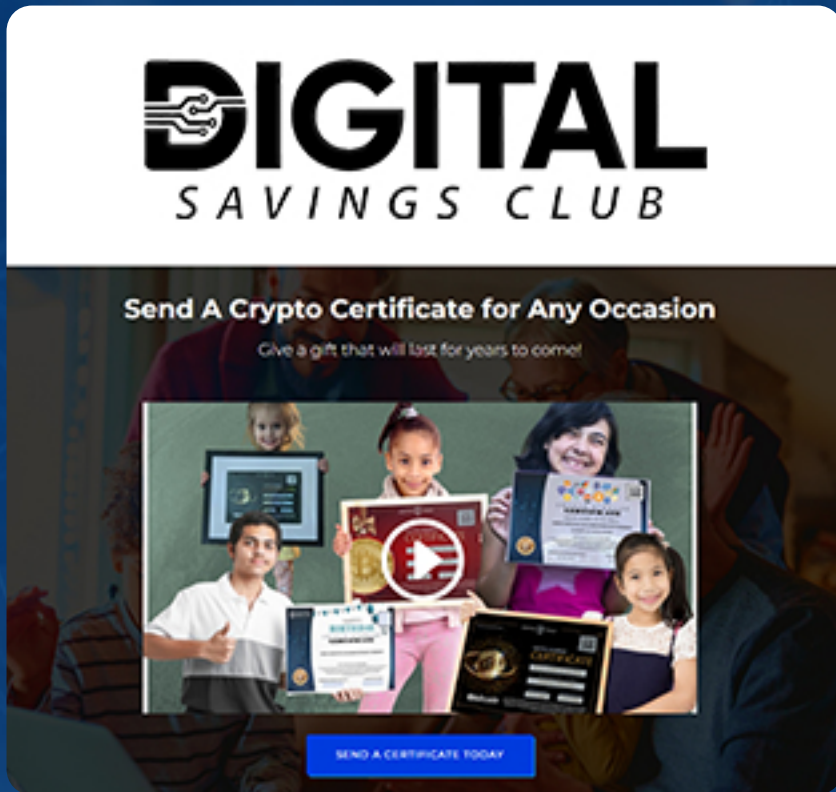

## Solution

Xcoins provided a highly valuable trusted platform and customers do easy signup. After signup, customers can buy or sell their cryptocurrency and get high value return in term of money or crypto

## Technologies

ReactJs for FE, Node js Typescript for backend, Postgre SQL for DB, Redis also used for exchange rates.

# Recent Portfolio

## Challenge

The client's need was to build world's first patent-pending Crypto Certificates, NFT Certificates, and Metaverse Certificates making it easy for anyone to give and share digital assets securely.

## Solution

The digital Saving's club offers its patent-pending Crypto Certificates, NFT Certificates, and Metaverse Certificates, any individual can securely give and share digital assets. In a few years, digital savings club certificates will become the norm. It is possible to enjoy a new level of utility with the cross-platform NFT Gallery Certificates.

## Technologies

PHP Laravel, Cryptocurrency using Fireblock, Node.JS, Wordpress, HTML, Javascript

# Recent Portfolio

## Challenge

A centralized solution has been developed by our company for creating document and its approval. You can create document and can do the internal and external transaction.

## Solution

Our Client wants to build a Trusted Centralized platform for digital document creation, certification, and approving by allowing the world population the ability at any level in multiple languages to utilize their service utilizing the IPFS (Interplanetary File System)

## Technologies

Php,laravel,Html,AWS,Cloudflare

# Recent Portfolio

**Shibariumtech**

## Challenge

Stable blockchain with low gas fee and huge market supply and demand

## Solution

Shibarium is a Layer-2(L2) Blockchain built on Ethereum chain. Gas price is low as comparison to other blockchain and has huge market supply.

## Technologies

Next.js,Go,Rust,Solidity,web3,AWS,Docker

# Recent Portfolio

## Challenge

In order for Shib ecosystem tokens to be used as part of the Shib ecosystem, a Dex was needed where users could exchange them for large volumes of different tokens

## Solution

In association with the client, we created a Dex where user can swap Ethereum based token with huge volumes and TVL.

## Technologies

Next.js,web3,AWS
